**Our vision:  
innovation  
in quality**

# A family-run company with Italian style.

Tecnoarredamenti was founded in 1973 in Aviano, a town in the province of Pordenone, in north-eastern Italy, where the company still has its registered offices and production plant. The company is owned by the Taurian family, which runs its business activities.

Our production plant covers 8,000 m<sup>2</sup>.

Our company's products are 100% made in Italy and 100% custom-designed.

At every stage of our production process, we are committed to the health and safety of our employees and to safeguarding the

environment. Our industrial production plant is designed to ensure rapidity and the very highest quality.

Right from the company's founding, Tecnoarredamenti has focused very closely on the quality of the product and the services provided to our clients. This policy has enabled us to consolidate our position and earn the trust of the market in which we operate.

By consistently following this approach, Tecnoarredamenti has today become an acknowledged leader in the sector, both in Italy and internationally.

# Creating space

Tecnoarredamenti has acquired extensive skills and experience in the world of hospitality, catering and food retail, and constantly monitors and interprets the new trends as they evolve. It is for this reason that our projects are always based on the most modern and highly functional elements, which are used together with innovative concepts to create truly eye-catching and comfortable furnishing ambiances. Our research laboratory is staffed by a team of highly-skilled architects and designers, all dedicated to developing innovative and effective solutions for major food retailers. Tecnoarredamenti has become an acknowledged hub for creative thinking aimed toward developing new product, communication and design concepts which anticipate developing trends in the national and international markets.

## t-studio creative team at work

At the beginning of the 2000s, Tecnoarredamenti created its t-studio, an independent department in the form of a laboratory of independent thinking whose aim is to develop original solutions which bring greater creativity to the company's projects. T-studio analyses the needs and objectives of each client, listens to their ideas, and then transforms this input into a fully customized project. This approach enables the team to develop comprehensive projects which not only meet the effective needs of the clients but whose originality is also surprising.
